NQOBILE HLONGWANE

Midrand, Gauteng | 076 130 9839 | nqobilehlongwane708@gmail.com | Portfolio : https://nqobilehlongwane.github.io/portfolio/

PROFESSIONAL SUMMARY

Motivated IT and Software Development graduate with a strong interest in software engineering, data science, AI and Machine learning. With knowledge in designing, developing, and maintaining software solutions using modern programming tools and frameworks. Proficient in Microsoft Office Suite and committed to continuous learning, collaboration, and contributing to innovative software development projects in a professional team environment.

TECHNICAL SKILLS

- Programming: Python, JavaScript, C++, SQL,OOP principles, Agile methodologies
- Frontend: HTML, CSS, React
- Backend: Node.js, Express.js, REST APIs, JSON Tokenization,JWT Authentication, API authentication
- Databases & Data: MySQL, SQLite Server, Database Design, Basic Database Encryption, Secure Data Storage, Access Control
- AI/ML (Foundational): NLP, Computer Vision, Neural Networks, Responsible AI, Feature Engineering, Data preprocessing

TOOLS AND PLATFORMS

- Microsoft Azure (Azure Cloud Services exposure)
- Git & GitHub
- Postman, Rest Client
- Microsoft Visual Studio Code
- Supabase database(AWS), MySQL Workbench
- Google Auth Client 2.0, Google Calendar Automation
- Automation/AI: Zapier, Trello, Miro, TinyLLama AI, Claude AI, ChatGPT

CORE COMPETENCIES

- Team Collaboration
- Communication Skills
- Adaptability
- Presentation skills
- Teamwork and independent work

EDUCATION

National Diploma in Information Technology (Software Development) -
Tshwane University of Technology (2024)

CERTIFICATIONS & TRAINING

- Udemy: SDLC, Github, Fundamentals of Software Design and Architecture, Software Testing, Elicit Requirements with Business Analysis
- Microsoft: Azure AI Fundamentals, Azure AI Engineer Associate, AI Fluency

---

PROJECTS

- **Legal Billing & Calendar Automation System (In development)**

- A solution that automates time capture, improves billing accuracy, integrates with existing tools, produces billing outputs,and ensures usability
- Automates time tracking, Syncs with Google Calendar, Generates professional invoices, Reduces manual billing work, Improves billing accuracy for legal firms
- Developed in Node.js, Express.js,Javascript,CRUD methodologies, RLS Supabase policies,and Google Auth Client 2.0

● **To-Do Task Management Web Application**

- A web app developed for managing To-do tasks. Encrypted for secure user data storage
- Developed using REST APIs, NodeJS, ExpressJS for backend
- Deployed on Render and Netlify
Link: https://todo-web-app-yx1i.onrender.com

- **Web-Based IDE**

- Beginner - friendly coding environment for frontend development
- Three-pane editor with real-time preview for HTML, CSS, and Javascript
Link: https://nqobilehlongwane.github.io/Web-based-IDE/
